Additional Reading

"That precious document the 'Toldoth Beni Noah,' or 'Book of the Generations of the Sons of Noah ,' well deserves to be called 'the most authentic record that we possess for the affiliation of nations.'" "The Mosaical narrative conveys the exact truth—a truth alike in accordance with the earliest classical traditions, and with the latest results of modern comparative philology." "The 'Toldoth Beni Noah' has extorted the admiration of modern ethnologists, who continually find in it anticipations of their greatest discoveries.... On the whole, the scheme of ethnic affiliation given in the tenth chapter of Genesis is pronounced 'safer' to follow than any other; and the 'Toldoth Beni Noah,' commends itself to the ethnic inquirer as 'the most authentic record that we possess for the affiliation of nations,' and as a document 'of the very highest antiquity.'" {George Rawlinson, 19th Century British scholar, historian and Christian theologian.}

"All that we know about savages, or may infer from their traditions and from old monuments, the history of which is quite forgotten by the present inhabitants, shew that from the remotest times successful tribes have supplanted other tribes.....continued

"At the present day civilized nations are everywhere supplanting barbarous nations, expecting where the climate opposes a deadly barrier; and they succeed mainly, though not exclusively, through their arts, which are the products of the intellect. It is therefore, highly probable that with mankind the intellectual faculties have been mainly and gradually perfected through natural selection...." "At some future period, not very distant as measured by centuries, the civilized races of man will almost certainly exterminate, and replace the savage races throughout the world. At the same time the anthropomorphous apes.....will no doubt be exterminated. The break between man and his nearest allies will then be wider, for it will intervene between man in a more civilized state, as we may hope, even than the Caucasian, and some ape as low as a baboon, instead of as now between the negro or Australian and the gorilla." {Charles Darwin, 19th Century, Biologist, Geologist, and Naturalist}
